PACKAGING**

Fresh from the Adriatic Sea

Our mission is to develop and promote a culture of healthy and balanced nutrition, as well as the consumption of fish and fish products. As one of the leading world producers of Mediterranean white fish, we pay special attention to outstanding quality and freshness, while at the same time taking care of the environment.

SUPERIOR FRESHNESS

We harvest our fish 6 days a week, so it can be delivered directly into your hands every day, by using a fast delivery system.

NUTRIENT RICHNESS

Cromaris fish is rich in omega-3 fatty acids, proteins, phosphorus, and vitamin D.

INNOVATION

Wide range of gutted fish, MAP and skin packaging, fillets, delis. Modern technology in production from hatchery, farms, all stages of production, until delivery of the products to customers.

ENVIRONMENTAL CARE

We base our manufacturing processes on the principles of sustainable development, regular monitoring of our ecological footprint and Efficient Waste Management System.

ANIMAL WELFARE

We farm all of our fish in low-density cages, and we've developed our own fish feed recipe adapted to every species, free from antibiotics and GMO raw materials.

CONFIRMED QUALITY

Cromaris is certified according to the requirements of many standards confirming food safety, environmental protection and social responsibility.

Advantages of MAP packaging

- Fish is gutted and packed right after the harvest, and ready to prepare
- Our range offers one-fish packs (*single pack*) and two-fish packs (*family pack*) with a fixed and variable product weight
- The packaging preserves the quality and freshness of the fish for 12 days
- The logos on the packaging are a guarantee of certified quality
- Provides availability in stores which do not have a fish market.

MAP packaging

- PET packaging made from 100% recyclable material
- The absorbent surface ensures freshness of the product
- The innovative design attracts attention in stores and markets, and brings additional information important for the consumer
- The ASC logo on the packaging guarantees responsible and sustainable farming.

Gutted Cromaris fresh fish is the ideal choice for quick and simple meal preparation

Based on years of investments into research and development, we have developed our own recipes for fish food, which ensures that Cromaris fish becomes rich in omega-3 fatty acids and has an ideal ratio of omega-3 and omega-6 fatty acids. This is important because food rich in omega-3 fatty acids (EPA and DHA) contributes to maintaining normal heart function. 100 g of Cromaris sea bream or sea bass has more than 40% of recommended daily intake of proteins, and about 9% of recommended daily intake of calories*. Our fish are also rich in proteins, phosphorus and vitamin D. Proteins, phosphorus and vitamin D contribute to normal bone development, and are especially important for the growth and development of bones in children. It is important to stick to balanced and varied diet, and a healthy lifestyle.
